

PARTNERSHIP OPPORTUNITIES

Impact for partners from our initiatives

As a UKGBC partner, you go beyond supporting progress, you help shape it. You will influence the direction of transformational initiatives, collaborate with industry leaders, and position your organisation as a visible and trusted leader in sustainability.

RESILIENCE & ADAPTATION £10K

Climate risk is moving from voluntary disclosure to legal exposure. Partners will be ahead of the curve, shaping how the sector defines, measures and responds and adapts to physical climate risks across buildings, estates and infrastructure. This work will further demonstrate how the built environment is our frontline of defence.

NATURE £10K

Decisive mobilisation of investment to restore the natural world is being called for. It is becoming clear that nature is a critical infrastructure upon which our national security, society and business operations rely. Partners here have a genuine opportunity to help us demonstrate that the built environment can be nature positive and help us to advocate for and embed the tools that will support action.

RESOURCE USE & CIRCULAR ECONOMY £5K

Supply chain risk, embodied carbon regulation, and materials volatility are converging. Partners will gain early insight into the enablers and barriers to circularity in the UK construction supply chain. Intelligence that is directly relevant to procurement strategy, client advisory, and risk management.

REGENERATIVE PLACES £10K

Our Regenerative Places Framework for Housing (launching Sept 16th), demonstrates the potential for housing-led retrofit and new build projects to become catalysts for thriving places. Next steps focus on how the Framework can be tested and implemented in real-world projects through a peer network to share learnings and insights.

ADVANCING NET ZERO £15K

Net zero is no longer about strategy but implementation. Partners at this level are investing in the sector's most comprehensive practical programme on whole life carbon and grid decarbonisation, with direct access to technical discussions and policy conversations that will shape progress on embodied carbon regulation and the pathway to clean electrification.

FINANCE, VALUE & RISK £10K

UKGBC, together with partners, aims to identify financial and risk-related enablers, build a shared understanding, and strengthen the evidence demonstrating the business case for sustainability. Founding Partners have a rare opportunity to break down barriers, with access to senior investment, insurance, legal, and valuation decision-makers in a structured, action-oriented setting.

SCALING INITIATIVE £5K

The Scaling Initiative aims to accelerate the adoption of sustainable solutions in the built environment by identifying barriers to scale, mobilising industry collaboration, and developing practical scaling pathways in three areas. Two focus areas have been determined so far: modular construction systems using sustainable materials and microgrids.

POLICY ADVOCACY £5K

Achieving a decarbonised, climate resilient and nature-positive future demands a fundamental shift in how we plan, design and invest in places. Partners on this initiative are working with us to tackle a policy challenge that is no longer about addressing issues individually, but rather creating a policy environment that incentivises and delivers climate mitigation, adaptation, ecological recovery and thriving communities together.

LEADERSHIP £10K

UKGBC's leadership programmes equip built environment professionals at all levels with the mindset, skills, and network to drive transformational change within their organisations and across the wider sector. Through immersive learning, peer collaboration, and reflective leadership development, we support leaders to challenge the status quo, redefine what's possible, and translate ambition into meaningful action.

EVENT SPONSORSHIP VARIABLE

Event sponsorship is an excellent opportunity for your brand to sit alongside UKGBC's. As well as supporting the work of UKGBC, sponsorship allows access to the event for networking and a chance to position your organisation as a leader in the sustainability space. Upcoming opportunities include a high-profile Parliamentary event, our regional event series and c-suite leaders' network.
